

UK WORKS GROUP ROYAL ENGINEERS
CAMP BASTION, AFGHANISTAN

**LETTER OF APPRECIATION
FOR**

FEKA CONSTRUCTION INDUSTRY & TRADE INC.

Izmir, TURKEY
www.feka.com

Dear Team FEKA,

On behalf of the Authority, **UK WORKS GROUP ROYAL ENGINEERS**, I would like to express my gratitude and admiration to you and your company for outstanding performance in support of our **Project No HERR/CON/44500, Crash Fire & Rescue Facility Project** in Camp Bastion, Afghanistan.

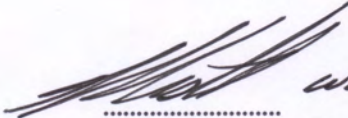

FEKA's efforts as main contractor to our organisation on this fast track, design-built project have surpassed even the high standards and expectations we set going into the project. Your commitment to quality and timely performance has been superb and it is evident that every member of your staff was dedicated to that commitment throughout the project duration. Your combined efforts are a significant reason why this project itself has been a success.

This project afforded FEKA the opportunity to demonstrate its talent and resourcefulness in both engineering, construction and creativity. Technically, FEKA left nothing unattended in providing the engineering and construction. Your quality control and health & safety was excellent and the finished product is now the gauge by which other projects are measured.

FEKA's overall performance on this project was absolutely first-rate. FEKA's spirit of cooperation, excellent communication and interactive problem solving skills created a project environment made the process seamless and painless.

You should be proud of your efforts of your entire staff and the results of their efforts. We offer recognition of your achievements and again our thanks for a job very well done. We are very proud our project and look forward to a future opportunity to work with FEKA again.

Sincerely,

.....
Authority Representative
